Irish hare

- Russet brown coat, long ears with black tips and eyes set high in the head.
- Seen all year round.
- Similar to brown hare.
- Found in upland and lowland areas but are most numerous on lowland grasslands.

Otter

- Long, slim body, webbed toes and a powerful rudder-like tail. Fur is chestnut brown and is slightly lighter on the belly.
- Seen all year round.
- Similar to mink.
- Found in small ditches to large rivers, as well as ponds, lakes and reservoirs.

Red squirrel

- Fur reddish-brown in summer, to chocolate brown with grey in winter. Reds have tufted ears in autumn and winter.
- Seen all year round.
- Similar to grey squirrel. Red squirrels are smaller and more delicate than grey squirrels.
- Occurs in broadleaved and coniferous woodland though becoming confined to coniferous.

Hedgehog

- Covered with dense sharp brown spines. When alarmed they roll themselves up into a tight ball.
- Usually seen at night. Hibernate during the winter.
- No similar species.
- Found in lowland habitats where there is grassland close to woodland, scrub or hedgerow. Also in urban and suburban gardens.

*Enjoy recording whilst taking care to avoid disturbance to wildlife.
Relevant access permission should always be sought prior to visiting any sites.*
